

2009 UNESCO Framework for Cultural Statistics

The 2009 UNESCO Framework for Cultural Statistics (FCS) is a collaborative effort by the UNESCO Institute for Statistics (UIS) and the UNESCO Culture Sector. Based on the 1986 Framework for Cultural Statistics, this revised version of UNESCO's cultural statistics methodology takes into account new concepts that have emerged since 1986 in the field of culture, including those related to new technologies – which have so drastically transformed culture and the ways it is accessed – intangible heritage, and evolving cultural practices and policies.
